Process Modeling

(Course Code: EA4BPM)

EA4BPM is a 1-day intensive guided hands-on workshop for learning quickly the most essential Sparx Systems EA software features to model BPMN-compliant business processes and collaborations using a simple case-study.

You will learn how use EA to model BPMN-compliant business processes and collaborations such as pools & lane, Activities, Tasks, Flows, Gateways and Events.

1 Introduction

1.1 Learning Objectives

This 1-day hands-on guided workshop introduces you to the most essential features of EA to model BPMN-compliant business processes and collaborations based on a simple case-study.

At the end of this workshop, you will be able to use the essential features of EA to:

- Model BPMN-based Business Processes & Collaborations
- Model Swimlanes, Pools, Lanes, Activities, Flows, Gateways, Events
- Model Collaborations between Pools

EA4BPM will not cover BPMN Choreography and Conversation models.

1.2 Systems Requirement

You will need to bring your own Microsoft Windows 7 or later notebook installed with

- Enterprise Architect Corporate Edition (Download 30-day evaluation license from <http://www.sparxsystems.com/bin/easetup.msi>).

1.3 Pre-requisites

Attendees are assumed to have prior knowledge and some working experience in business process/workflow/SOP management.

1.4 Suggested Topics

- Start and Configure a new EA Project
- Root model, Packages & sub-packages for Business Process Modeling
- Model Business Process Diagram elements: Pools, Lanes, Activities, Flows, Gateways, Events
